I focus on developing our people that are at an early learning and development stage of their careers.

I have over 18 years' experience managing paralegals and apprentices. My role is to manage our apprenticeship recruitment programme alongside wider operational matters across emerging talent. I thrive on supporting and challenging those at Cripps who are at the start of their careers, and helping them in their own personal development. I have a particular interest in neurodiversity, inclusion and mental health.

If I'm unavailable, please contact:
