

GHG REPORT

1st May 2023 - 30th Apr 2024

Organisation: Cripps LLP

Export date: 15/01/2025

This report provides details of greenhouse gas (GHG) emissions for Cripps LLP over the accounting year ending April of 2024, also known as a carbon footprint.

The carbon accounts shown below allocate your GHG emission sources into Scope 1 (direct emissions from company owned or controlled sources), Scope 2 (indirect emissions from the generation of electricity consumed), and Scope 3 (all other relevant upstream and downstream sources). This is the format favoured for official reporting.

Annual carbon reporting is the foundation of Cripps LLP's Net Zero plan, providing the business with its base year, enabling it to identify key emission sources, develop carbon reduction activities and to monitor its progress towards reduction goals.

This carbon footprint has been calculated on the Net Zero Now platform in accordance with the Greenhouse Gas Protocol Corporate Standard, an international standard that is widely regarded as best practice for GHG accounting and reporting.
